The previous action is mooted by this election of species requirement.

Election of a single species is required.

The species are selected from working examples 1-8, the compounds where one of R1 and R2 are A as on p, 8 of the specification and the compounds where R1 and R2 are combined to form an anthracene ring of formula B as on pl 9 of the specification.

The presumption of a single inventive concept in this PCT origin application is blunted by the disclosure of a fluorescent compound within the instant invention (see instant claim 6 e.g.) by the disclosure of a compound of claim 6 where R22 is ethyl and R21 is H.. See the supplied print-out from a CAS ONLINE search. The publication is JP published application 60-025195.

Applicants must elect one of the above species and list all claims reading thereon.

It appears that the claims in which the substituents on the 9-position substituent which are defined in functional terms will be subject to section 112 rejections.
